LeetCode | Portfolio

EDUCATION

Maharaja Agrasen Institute of Technology, Delhi

B.Tech in Information Technology

CGPA: 9.05 / 10.0

Expected Graduation: 2028

Vivekanand School, Delhi

Class XII

Percentage: 91%

2024

St. Thomas School, Ghaziabad

Class X

Percentage: 94%

2022

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, HTML, CSS

Frameworks: React.js, Node.js

Databases: Firebase

Tools: GitHub, VS Code

Core: Data Structures & Algorithms (DSA) , Object Oriented Programming (OOPs) , DBMS

PROJECTS

Caste Census System | NSUT Hack Delhi

- Built a secure digital census platform for structured demographic data collection and management.
- Integrated ML-based Aadhaar verification to validate identities and reduce duplicate records.
- Implemented SHA-256 blockchain hashing and analytics dashboards to ensure data integrity and support policy planning.

Real-Time Public Transport Tracking System | Smart India Hackathon

- Developed a GPS-enabled PWA supporting real-time vehicle tracking and route monitoring.
- Built an admin dashboard using REST APIs for fleet management and operational analytics.
- Achieved 95% offline functionality through service workers for low-connectivity environments.

Threads of Truth — Supply Chain Traceability | IIT Delhi

- Developed a blockchain-based supply chain traceability system to improve product transparency and tracking.
- Implemented digital signature verification for product authentication and counterfeit prevention.
- Optimized frontend state management and API handling, reducing application overhead by **60%**.

ONDC × BECon'25 Hackathon | IIT Delhi

- Designed scalable digital commerce solutions focused on distributed systems and high-availability architecture.
- Collaborated on system design and technical solutions addressing real-world scalability challenges.

ACCOMPLISHMENTS

- Top 30** — NSUT Hack Delhi Hackathon for designing a secure ML-integrated and Hash generated census platform solving real-world data authenticity challenges.
- Semi-Finalist** — IIT Delhi Hackathon (Top 25/200+ teams) for building a scalable blockchain-based supply chain traceability system.
- Deloitte Technology Job Simulation (Forge)** — Completed industry-based software engineering tasks involving coding, debugging, and problem-solving aligned with real-world development workflows.
